Abstract Statement on the examination of the Chittaranjan Town Municipal accounts for 1-1-1941 -

Serial No	Extra accounts continued - Description of item.	Remarks of Auditor	Reply or explanation of the administrator of the fund
24	The duty on oils is two annas per md. ie 12 Seers according to local custom but generally 10 Seers by measure One Seer by measure of Jungle (বন) (বুনো) or 1 Seer of (চাষ) (চাষী) or any other oil seed will yield one Seer by weight (or (কোয়ালিটি) ভাল) (খারাপ) or (মাঝারি) etc) Therefore 40 or 48 Seers by measure of any oil seed will yield 40 or 48 Seers by weight or one md of oil - a little more or less - Therefore the duty of 4 as or 200 Seers by measure which generally forms a Khandi (২০ মণ) seems quite disproportionate to that of duty on oil seeds reasonably therefore the duty on a Khandi of oil seeds may be 4 to 5 times of 2 annas per above Stand point, the Cost of work (or মজুরি) being a set of against cost of labour involved in extracting oil from the seeds - the cost of oil being (1) Cost of oil Seeds + the Cost of labour in extracting the oil - So that one Seer of oil seed by measure will yield one Seer by weight of oil without extra cost	It is a matter for the Consideration of the Municipal Council to enhance the rate of duty on oil seeds on the agreement to set forth to improve the resources of the Municipality by	This is a subject which requires Govt Sanction for any modification of the rates The question has been taken up as a special subject after necessary action is taken as per provisions of the Act Regn the matter will be submitted for Sanction of Govt Under Resolution No 3 dated 5-2-1942 approving the enhancement of duty on oil seeds -

Copy forwarded for information to the President
